

Discovery Industrial Facility (Discovery) is a production facility offering outsourcing services for heavy machinery components and steel structures. If your company is revising its supply chain and considering new outsourcing opportunities for products or components, we would be delighted to discuss this with you.

We are particularly looking to create long-term partnerships with heavy equipment manufacturers whose processes require individually tuned production facilities, special preparation, workforce training, strict quality requirements, etc. Generally, we are looking for customers who need an individual approach and whose orders cannot be completed in general-purpose metal or assembly job-shops.

For such companies, we provide over 58,000 square meters of facilities and the resources to prepare the production of any products, regardless of complexity. Along with matching technical expectations, we strive to make sure the end cost of the product is still very competitive. Our goal is to ensure our customers get the best possible price, service, and results.

Our facility is located just 70 km from the EU border in Stryi, Lviv region, Ukraine. Discovery has amassed an extensive record of international projects completed over the last 14 years and products from our factory can be found throughout the five most populous continents of the world. We have provided all our past and present customers with the finest-quality work, excellent customer service, and attractive rates. Discovery has a strong management team, qualified to handle a multitude of complex and challenging projects.

Do not hesitate to contact me personally if you would like to find out more information on how we can help.
